About UMPSA

Established as a technical university in 2002, Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA) offers a variety of engineering-and technology-based technical programmes, including high-level Technical and Vocational Education and Training (TVET)

Ranked as one of the best in Research and Innovation within the classifications of Malaysia Technical University Network (MTUN) and Non-Research University (Non RU), UMPSA is steadfastly committed to innovating and developing unique academic programmes through strategic international collaborations. A milestone of such innovation is UMPSA's world class dual-degree engineering programme offered in collaboration with Germany's Karlsruhe University of Applied Sciences (HsKA) - now seen as the benchmark for other public institutions of higher learning in Malaysia. In the field of research, UMPSA collaborates with local industries to focus on industry-related applications. Such research collaboration enriches the teaching and learning modules at the university, while simultaneously promotes commercialization of research output and products.

Overview

It was established to support the policy of Malaysian Government to offer more programs at Masters and PhD level to meet the needs of working people and national agenda to become a high-income economy in 2020. The Malaysian government is serious in promoting lifelong learning and human capital development among its citizens. This is clearly stated in the Tenth Malaysia Plan, which has among its objective to develop a culture of continuous knowledge acquisition in line with rapid technological changes and increasing levels of knowledge in the economy.

To increase the competitiveness and economic resilience, the Faculty of Industrial Management (FIM) focuses on value added activities and managing industries. To that end, Master of Business Administration will assist and contribute towards the competitiveness and resilience of the economy in general and the East Coast area of peninsular Malaysia in particular.

The program's curriculum structure consists of ten (9) core courses, one (1) research methodology, two (2) projects and three (3) electives under four (4) specializations.

It focuses on the Bioeconomy specialization with 10 core courses similar on campus and 5 elective courses which are Product Development and Commercialization, Global Biobusiness Innovation, Project Management in Bioeconomy, Supply Chain in Bioeconomy and Contemporary Issues in Biotechnology. In total, there are four areas of specializations which are (1) Business Engineering (2) Technology Management (3) Engineering Management (4) Bioeconomy.
